Reactive Walk Confidence Plan

FITDOG TRAINING ACADEMY

Rebuilding Real-World Confidence

Stack small wins. Build real confidence.

Progress comes from controlled wins, not throwing the dog into chaos.

TRAINER NOTE

Stay below threshold. Distance and safety come before performance.

Best reward

Distance first

Your dog learns when they can notice and still think.

Soft leash

Create space early. Tension raises arousal.

Mark calm

Reward looking, sniffing, and disengaging.

1 Training goal

YOUR GOAL THIS WEEK

Confidence is built by stacking successful experiences.

2 Lesson focus checklist

3 Step-by-step practice plan

Pick the easiest stage from your progression list for this week.

Set up one controlled rep at working distance. Mark calm behavior.

If your dog succeeds 4/5 times, note whether to hold or advance one step.

If your dog fails twice, move back one stage — non-linear is normal.

Write one real-world win from this week, however small.

5 Common mistakes to avoid

AVOID THESE

- Getting too close to triggers too fast.
- Disturbing the leash at triggers.
- Advancing stages after one lucky success.

If this happens, try this

IF THIS HAPPENS, TRY THIS

World takes treats outside triggers.
 Handling before you make too close.
 Signs of difficulty. Contact Fitdog if safety is a concern.

6 Ready to progress?

- ☐ I can explain "Rebuilding Real-World Confidence" clearly.
- ☐ My dog stayed under threshold most of the week.
- ☐ I ended sessions while my dog could still succeed.
- ☐ My dog notices triggers and eats at working distance.

Practice one skill from "Rebuilding Real-World Confidence" three times this week. Note what to simplify.
